

flo User Manager 3

Now available

Flo User Manager allows you to manage the user and group accounts on your network with a minimum of fuss.

Version 3 is specifically designed to work with Active Directory but will include all the functionality of version 2 as well as various new features to take full advantage of the Active Directory.

- Creates and configures accounts with only a handful of clicks.
- New accounts can be imported from file. Existing accounts can be deleted in a similar way.
- Copy files or folders to selected home folders.
- Move home folders from one server to another.
- Modify StopIt 3 quotas.
- Scan home folders for unwanted files.

- Designed for use with Active Directory (Windows 2000 or 2003 Server) and Windows NT4 Server networks.
- Supports Windows NT4, 2000 or XP clients.
- Download beta Evaluation version from website.
- Free support for first year.

flo COMPUTER SERVICES

Software for network management and control

MaxLogons

Flo MaxLogons allows you to prevent users from being logged onto two or more workstations at the same time.

Users who are members of a specific network group are restricted. The restriction can also be tailored to allow logging on to a specified number of workstations at the same time.

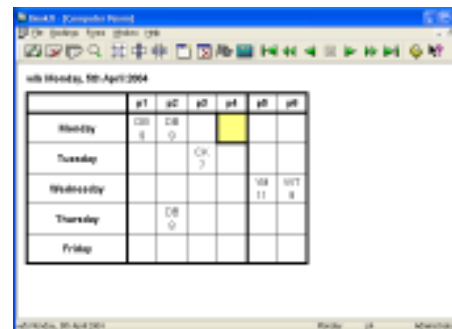

Site licence prices:
Windows 95/98/Me **£80**
Windows NT/2000/XP **£80**
Buy both for £120

- Download evaluation version from website.
- RM Connect 2.4 package and RM Community Connect 3 MSI package available.

BookIt 2.5

BookIt is a simple-to-use booking system. Book computer rooms and resources from any network workstation.

BookIt allows you to define your own booking forms. Each form can contain bookings for one day or one week.

Ordinary users cannot overwrite or cancel other bookings, but nominated users can do so and also make block bookings.

BookIt can be used by several network users at the same time.

- Windows NT4, 2000 and 2003 Server compatible.
- Supports all Windows workstations (95 and later).
- Download evaluation version from website.

Price:
Site licence **£160**

StopIt 3

The Quota Management System

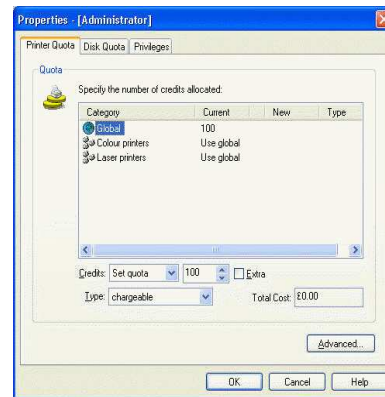

Take control of network printing and users' home folder size.

StopIt 3 allows you to track printing on your network. You can see the number of pages sent to each printer, by whom and when. In addition, StopIt 3 can prevent users from printing unless they have enough printer credits in their accounts for each page they want to print.

StopIt 3 also monitors the disk space taken by users' files in their home folders. When their allocated space is exceeded, they are asked to move or delete files.

Printer Auditing and Control

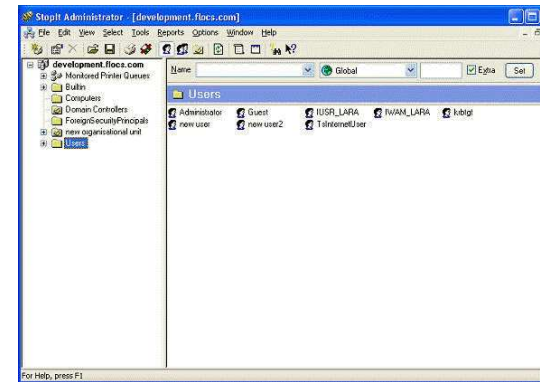

- Printer credits can be given to users for use with all printers, to individual printers or to groups of printers.
- Monitored printers can have restrictions imposed on an individual user basis, eg. documents must be saved first, multiple copies can be restricted, certain document titles restricted, printing the same document several times in quick succession stopped.
- Reports can be generated about printer usage. These can be categorised by user, group or printer and for a specified period of time as required.

Setting a quota

Home Folder Monitoring

- Has the considerable benefit of allowing users to log on even if they are over quota, so not interrupting the beginning of a lesson whilst warning them that they must delete or move some of their files.
- If a user is persistently over quota, the account can be disabled automatically.
- Users can be given a number of grace logons before disabling their accounts.
- Where accounts are disabled this is only done at log off, thus allowing any work done during a session to be saved.
- Reports can be generated about home folder size, history of allocated quotas and accounts which have been disabled.

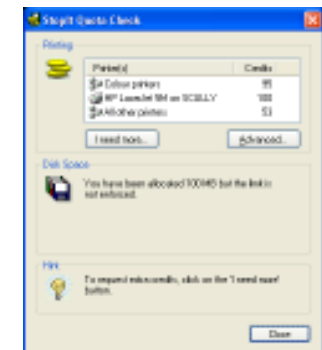

StopIt Administrator

Management of quotas

- Printer and disk quotas can be set for individual users, for all users, or by membership of groups or organisational units (when available).
- Quota changes can be scheduled automatically.

Users' quotas

- Users can check their quotas using **Quota Check**.
- If permitted, users can use **Quota Check** to request more credits or disk space.
- **StopIt 3** will alert you to requests which can be granted or discarded.

Quota Check

General points

- Designed for use with Active Directory (Windows 2000 or 2003 Server) and Windows NT4 Server networks.
- **StopIt 3** must be installed on any server through which printing will be monitored and any server on which users' home folders are to be checked.
- Supports all Windows clients (95 and later).
- Download evaluation version from website.
- Free support for first year.

Prices:

Server Licence	£250
Client Access Licence (CAL)	£1

Schools need only buy 1 Server Licence. Colleges must buy 1 Server Licence for each server on which StopIt will be installed. All purchasers must buy 1 CAL for each workstation on their network.

20% discount for StopIt 2 or NetSpace Plus upgrades
